A SHORTENED STATUTORY PERIOD FOR REPL WHICHEVER IS LONGER, FROM THE MAILING ID. - Extensions of time may be available under the provisions of 37 CFR 1. after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period. - Failure to reply within the set or extended period for reply will, by statut Any reply received by the Office later than three months after the mailing earned patent term adjustment. See 37 CFR 1.704(b).	DATE OF THIS COMMUNIC. 136(a). In no event, however, may a replaced in the second will expire SIX (6) MONTE te, cause the application to become ABA	ATION. Oly be timely filed HS from the mailing date of this communication. NDONED (35 U.S.C. § 133).				
Status						
1) Responsive to communication(s) filed on 21 I	March 2007.					
•	,—					
	3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is					
closed in accordance with the practice under	Ex parte Quayle, 1935 C.D.	11, 453 O.G. 213.				
Disposition of Claims		•				
4) Claim(s) 6,7,15-17,19-22,24,67 and 68 is/are pending in the application.						
4a) Of the above claim(s) is/are withdra	awn from consideration.					
5) Claim(s) is/are allowed.		•				
6)⊠ Claim(s) <u>6,7,15-17,19-22,24,67 and 68</u> is/are	rejected.					
7) Claim(s) is/are objected to.						
8) Claim(s) are subject to restriction and/	or election requirement.					
Application Papers						
9)⊠ The specification is objected to by the Examin	er.					
10)⊠ The drawing(s) filed on <u>29 April 2005</u> is/are: a) accepted or b)⊠ objected to by the Examiner.						
Applicant may not request that any objection to the	e drawing(s) be held in abeyand	e. See 37 CFR 1.85(a).				
Replacement drawing sheet(s) including the correct						
11) The oath or declaration is objected to by the E	xaminer. Note the attached	Office Action or form PTO-152.				
Priority under 35 U.S.C. § 119	•					
12) Acknowledgment is made of a claim for foreig a) All b) Some * c) None of:		119(a)-(d) or (f).

Art Unit: 2816

DETAILED ACTION

Claims 6-7, 15-17, 19-22, 24 and 67-68 are pending and are under examination.

Drawings

1. Figures 1-3 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

2. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

3. The disclosure is objected to because of the following informalities: page 2, line 24 reference to "claim 1" which is no longer pending. Similar references are found in pages 3-28;

(13) is disposed between GND power terminal and the power supply VDDH.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

page 36, line 1, "a GND power source" is misdescriptive. Figure 4 shows the third logic circuit

- 4. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 5. Claims 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 6, the recitation of "a switching circuit which is disposed between a power source terminal of the level conversion core circuit and the second power source" is indefinite because it is misdescriptive. Figure 24 which claim 6 read on, shows the switching circuit (10) is disposed between a power source terminal of the level conversion core circuit (ground terminal) and the level conversion core circuit. Correction is required. Furthermore, the recitation of "the third logic circuit generating a control signal under control of the first power source (VDDL)" is misdescriptive. Figure 24 shows the third logic circuit receives the second power source (VDDH). Did the applicant means the second power source (VDDH)? Clarification is required.

In claim 15, the recitation of "to control a signal" in line 6 is unclear. Did applicant mean NAND circuit produces the control signal? Clarification and correction are required.

In claim 17, the recitation of "a GND power source" is unclear as to if this GND power source is the same as or is different from "the power source terminal of the level conversion core circuit" recited in claim 6, lines 8-9. Clarification is required.

In claim 19, the recitation of "a drain terminal of other pMOS being connected to each of the level conversion outputs" in line 5 is incorrect. Figure 26 shows drain terminals of the at least two pMOS 103303 being connected to the level conversion outputs. Similarly, the recitation in line 8 is also incorrect for the same reason as in line 5. Clarification and correction are required.

In claims 22 and 24, the recitation of "the level shift outputs" in lines 5 and 8 lacks proper antecedent basis.

In claim 67, the recitation of "a switch circuit" is indefinite because it is unclear as to if this switch circuit is the same as or is different from the switching circuit recited in claim 6, line 8. Clarification and correction are required.

In claim 68, the recitation of "a level shift output" in line 11 is unclear as to if this level shift output is different from the level conversion output signal recited in lines 5-6.

Claims 7, 16 and 20-21 are indefinite because of the technical deficiencies of claim 6.

Allowable Subject Matter

6. Claims 6-7, 15-17, 19-22, 24 and 67-68 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. In this regard, applicant's cited prior art has been carefully considered.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan T. Lam whose telephone number is 571-272-1744. The examiner can normally be reached on Monday to Friday (7:30 am to 6:00pm).

Art Unit: 2816

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Pascal can be reached on 571-272-1769. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
